

Micronutrient

Inject-A-Min[®] Iron-Zinc

Inject-A-Min[®] Iron-Zinc is a micronutrient formulation containing water-soluble iron and zinc sulfates in a completely enclosed micro-infusion system for pin oaks and many other tree species growing in non-native alkaline soils. Because the elements are placed directly into the trees vascular system, the benefits of Inject-A-Min Iron-Zinc can be evident for one to five years compared to adjacent untreated trees. Iron and zinc deficiencies are characterized by young leaves exhibiting darker green veins with a yellowing or loss of color between veins.

- Promotes growth
- Based on sulfated elements
- High levels of iron and zinc
- Long-lasting effect
- Completely enclosed, minimal risk application method

Guaranteed Analysis: Nitrogen (N) 1.00%
Potash (K₂O) 1.00%
Sulfur 1.90%
Copper 0.10%
Iron 1.44%
Manganese 0.12%
Zinc 1.11%

Micronutrient Inject-A-Min[®] Iron-Zinc

Treatment Uses

Iron and Zinc Deficiencies
Nutrient Deficiencies
Environmental Stress
Alkaline soils
