

# New Improvements for 2015!

## ZÜBAT

Professional heavy-duty hand saw with curved mono-constructed blade. Features rust-resistant, hard chrome-plated, taper-ground curved blade with an impulse-hardened non-set tooth design.

**For 2015 Silky Saws has made New Improvements to the handle and scabbard of the Zübat hand saw line.**

**The New Handle fits into the New Scabbard more securely.** This feature keeps your saw safely secured in your scabbard until you are ready to use.

**#1 SELLING PROFESSIONAL ARBORIST SAW IN THE WORLD!**

## Identifying the improvements

**NOTE:** Due to these improvements the new and old scabbard will not be interchangeable.

**New Handle** is slimmer in areas allowing for the creation of a notch (Image 1.1) at the blade side of the handle. This helps you to keep your hand on the handle and away from the blade. The notch is also essential to keeping the saw secured in the scabbard (Image 1.2). New Handle has an indentation where you see the lanyard hole (Image 1.2) making that hole much more accessible and has Japan on one side.

**New Scabbard** now has 2 guide rollers (Image 1.3) to guide and secure the saw with new handle into the scabbard (Image 1.1.4).
