DMM
PROFESSIONAL 2010

DMM's range of Rigging Hubs have a wide range of uses beyond carabiners. Designed to be textile friendly, webbing and rope will feel equally at home with our hubs.

Use the slots for opposite and opposed carabiners, girth hitch Prusik loops and webbing slings, or run rope through the inner ring. Or do it all at the same time to manage multiple or complex anchor systems! Hubs have two strength ratings – strong slots and a super strong inner ring.

GENERIC FEATURES

- Helps organise single or multiple anchor systems
- Compatible with a wide range of hardware and textile connecting components
- 'Textile friendly' surfaces with large radius
- Inner ring is compatible with running rope[s] allowing hauling systems and backups to be very simply configured
- Outer bar is dimensioned for optimum carabiner configuration
- Slots allow carabiners to be 'opposite and opposed'
- CNC machined from 7075 T6 aluminium for high strength to weight ratio
- Anodised to EN 12373-1:2001 Class 10E1 for corrosion protection
- CE certified to EN 795B:1997 [transportable temporary anchor devices] for use as PPE
- Individual serial marking
- Made in Wales, UK
